DISTINCTIVE sky™

Extensive use of environmentally friendly & recycled materials

Innovative design / energy saving systems / healthy interior

energy efficiency

- integrated/innovative design
- daylight & motion sensors
- lighting control station
- multi-mode thermostat
- cool roof
- sun control devices
- energy management system
- commissioning
- available as Net Zero Energy

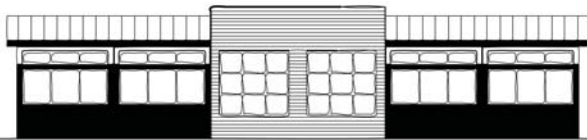

indoor air quality

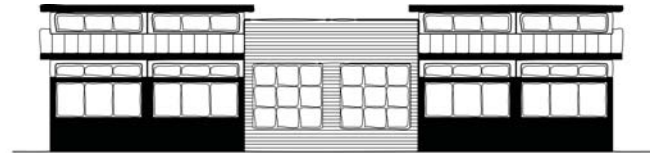

- quiet air handler
- acoustical interior treatments
- low emitting materials
- natural daylight throughout
- operable windows
- IAQ/IEQ program during construction

sustainable materials

- low / no VOC materials
- high recycled content
- environmentally friendly products
- FSC certified wood
- measured landfill diversion
